HPI

Pleasant 77-year-old nondiabetic female presents today for 1-week follow-up on wound to the bottom of her right great toe. She has been wearing her post op shoe as directed. No other complaints at this time.

ROS

Patient reports **dry eyes** but reports no vision change, no irritation, and no eye disease/injury. She reports **shortness of breath when walking and shortness of breath when lying down** but reports no chest pain, no arm pain on exertion, no palpitations, no known heart murmur, and no ankle swelling. She reports **frequent diarrhea** but reports no abdominal pain, no nausea, no vomiting, no constipation, normal appetite, not vomiting blood, no dyspepsia, and no GERD. She reports **increased urinary frequency** but

ELLISON, Edna F (id #23778, dob: 01/22/1947)

reports no incontinence, no difficulty urinating, and no hematuria. She reports **muscle aches, arthralgias/joint pain, and back pain** but reports no muscle weakness, no swelling in the extremities, no neck pain, no difficulty walking, no cramps, no osteoporosis, and no fractures. She reports **dry skin** but reports no abnormal mole, no jaundice, no rashes, no laceration, no non-healing areas, no changes in hair/nails, no psoriasis, no change in skin color, and no breast lump. She reports **numbness** but reports no loss of consciousness, no weakness, no seizures, no dizziness, no migraines, no headaches, no tremor, no gait dysfunction, and no paralysis. She reports **depression** but reports no sleep disturbances, feeling safe in a relationship, no alcohol abuse, no anxiety, no hallucinations, no suicidal thoughts, no mood swings, no memory loss, no agitation, no dementia, and no delirium. She reports **fatigue and cold intolerance**. She reports **easy bruising** but reports no swollen glands, no excessive bleeding, no anemia, and no phlebitis. She reports no fever, no night sweats, no significant weight gain, no significant weight loss, no exercise intolerance, no chills, and no malaise. She reports no difficulty hearing and no ear pain. She reports no frequent nosebleeds, no nose problems, and no sinus problems. She reports no sore throat, no bleeding gums, no snoring, no dry mouth, no mouth ulcers, no oral abnormalities, no teeth problems, no ringing in the ears, and no sinusitis. She reports no cough, no wheezing, no shortness of breath, no coughing up blood, and no sleep apnea. She reports no runny nose, no sinus pressure, no itching, no hives, and no frequent sneezing.

Physical Exam

Constitutional: General Appearance: well-developed. Level of Distress: NAD.

Cardiovascular: Arterial Pulses Right: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Arterial Pulses Left: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Edema Right: **edema**. Edema Left: **edema**. Varicosities Right: **varicosities**. Varicosities Left: **varicosities**.

Integumentary: Foot Right: no lesions, ulcers, skin rash, or subcutaneous nodules and skin temperature normal and **dry**. Foot Left: no lesions, ulcers, skin rash, or subcutaneous nodules and skin temperature normal and **dry**.

Neurological: Neurological Right: gross sensation intact, pin prick sensation normal, and no paresthesias. Neurological Left: gross sensation intact, pin prick sensation normal, and no paresthesias. Manual Muscle Test Right: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance). Manual Muscle Test Left: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance).

Musculoskeletal: Muscle Strength and Tone Right: normal and normal tone. Muscle Strength and Tone Left: normal and normal tone. Joints, Bones, and Muscles Right: no malalignment or bony abnormalities and **contractures, limited ROM, and pain to palpation**. Joints, Bones, and Muscles Left: no malalignment or bony abnormalities and **contractures, limited ROM, and pain to palpation**.

Class: Class B Right: **skin texture shiny and thin; dorsalis pedis pulse diminished posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class B Left: **skin texture shiny and thin; dorsalis pedis pulse diminished posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class C Right: no burning, paresthesias, claudication, cold foot, or temperature changes and **edema**. Class C Left: no burning, paresthesias, claudication, cold foot, or temperature changes and **edema**.

Toenails 1 through 5 are thickened, discolored, dystrophic, clinically mycotic, and not elongated bilaterally.

Full-thickness ulceration noted plantar right hallux measuring approximately 1.7 cm x 1.2 cm x 0.2 cm.

Minimal surrounding erythema.

DP, PT palpable bilaterally

Procedure Documentation**Skin Graft-Innovamatrix:**

Skin Graft To advance wound healing, an appropriate skin substitute was selected and applied to wound after debridement.

Skin Substitute: Innovamatrix AC

Size-- 2 cm x 2 cm

Product ID-- IMX-0202-01

Lot Number-- 030823-1

Expiration Date-- 2025-03-08

Application number-- 5

Zero graft wastage.

Assessment / Plan**1. Open wound of right great toe**

S91.101D: Unspecified open wound of right great toe without damage to nail, subsequent encounter

2. Burn of toe of right foot

T25.131A: Burn of first degree of right toe(s) (nail), initial encounter

3. Walking disability

R26.2: Difficulty in walking, not elsewhere classified

4. Peripheral nerve disease

ELLISON, Edna F (id #23778, dob: 01/22/1947)

G64: Other disorders of peripheral nervous system

5. Antalgic gait

R26.89: Other abnormalities of gait and mobility

6. Peripheral vascular disease

I73.9: Peripheral vascular disease, unspecified

Discussion Notes

Patient evaluated today and a physical examination was performed.

Discussed diagnosis, etiology, and treatment options with patient.

Sharp debridement of full-thickness ulceration to level of subcutaneous tissue performed today without incident. Innovamatrix skin graft was applied and was covered with Adaptic gauze and wrapped with a dry gauze dressing. Patient to keep dressing intact until we see her this upcoming Thursday for dressing change.

Patient is to avoid barefoot walking.

Continue daily foot inspections.

Continue offloaded postop shoe at all times.

Counseled on smoking cessation.

ABIs were normal

If patient develops any concerning pedal changes or possible signs of infection, patient instructed to contact office immediately for urgent evaluation.

Patient to follow-up in 1 week for wound care.

HPI

Pleasant 77-year-old nondiabetic female presents today for 1-week follow-up on wound to the bottom of her right great toe. Patient had to cancel her appointment last week due to feeling ill and reports she changed the dressing herself. She reports that she did not have any Adaptic gauze so she just put a dry gauze dressing on the area on Friday and has left it intact until today. She has been wearing her post op shoe as directed. No other complaints at this time.

ROS

Patient reports **dry eyes** but reports no vision change, no irritation, and no eye disease/injury. She reports **shortness of breath when walking and shortness of breath when lying down** but reports no chest pain, no arm pain on exertion, no palpitations, no

ELLISON, Edna F (id #23778, dob: 01/22/1947)

known heart murmur, and no ankle swelling. She reports **frequent diarrhea** but reports no abdominal pain, no nausea, no vomiting, no constipation, normal appetite, not vomiting blood, no dyspepsia, and no GERD. She reports **increased urinary frequency** but reports no incontinence, no difficulty urinating, and no hematuria. She reports **muscle aches, arthralgias/joint pain, and back pain** but reports no muscle weakness, no swelling in the extremities, no neck pain, no difficulty walking, no cramps, no osteoporosis, and no fractures. She reports **dry skin** but reports no abnormal mole, no jaundice, no rashes, no laceration, no non-healing areas, no changes in hair/nails, no psoriasis, no change in skin color, and no breast lump. She reports **numbness** but reports no loss of consciousness, no weakness, no seizures, no dizziness, no migraines, no headaches, no tremor, no gait dysfunction, and no paralysis. She reports **depression** but reports no sleep disturbances, feeling safe in a relationship, no alcohol abuse, no anxiety, no hallucinations, no suicidal thoughts, no mood swings, no memory loss, no agitation, no dementia, and no delirium. She reports **fatigue and cold intolerance**. She reports **easy bruising** but reports no swollen glands, no excessive bleeding, no anemia, and no phlebitis. She reports no fever, no night sweats, no significant weight gain, no significant weight loss, no exercise intolerance, no chills, and no malaise. She reports no difficulty hearing and no ear pain. She reports no frequent nosebleeds, no nose problems, and no sinus problems. She reports no sore throat, no bleeding gums, no snoring, no dry mouth, no mouth ulcers, no oral abnormalities, no teeth problems, no ringing in the ears, and no sinusitis. She reports no cough, no wheezing, no shortness of breath, no coughing up blood, and no sleep apnea. She reports no runny nose, no sinus pressure, no itching, no hives, and no frequent sneezing.

Physical Exam

Discussion Notes

Patient evaluated today and a physical examination was performed.

Discussed diagnosis, etiology, and treatment options with patient.

Sharp debridement of full-thickness ulceration to level of subcutaneous tissue performed today without incident. Innovamatrix skin graft was applied and was covered with Adaptic gauze and wrapped with a dry gauze dressing. Patient to keep dressing intact until we see her this upcoming Thursday for dressing change.

Patient is to avoid barefoot walking.

Continue daily foot inspections.

Continue offloaded postop shoe at all times.

ABIs were normal

If patient develops any concerning pedal changes or possible signs of infection, patient instructed to contact office immediately for urgent evaluation.

Patient to follow-up in 1 week for wound care.
