HPI

Pleasant 75-year-old diabetic female presents today for follow-up on left leg wounds. Patient reports that she and home health has been dressing the wounds with dry gauze dressing and Ace bandages over the Adaptic gauze. She reports she has kept the Adaptic gauze in place since last visit. Reports that the leg pain has improved. Patient reports she was recently diagnosed with breast cancer and has to decide between radiation or mastectomy. No other complaints at this time.

ROS

Patient reports **vision change** but reports no dry eyes, no irritation, and no eye disease/injury. She reports **easy bruising** but reports no swollen glands, no excessive bleeding, no anemia, and no phlebitis. She reports **runny nose and frequent sneezing** but reports no sinus pressure, no itching, and no hives. She reports no fever, no night sweats, no significant weight gain, no significant weight loss, no exercise intolerance, no chills, and no malaise. She reports no difficulty hearing and no ear pain. She reports no frequent nosebleeds, no nose problems, and no sinus problems. She reports no sore throat, no bleeding gums, no snoring, no dry mouth, no mouth ulcers, no oral abnormalities, no teeth problems, no ringing in the ears, and no sinusitis. She reports no chest pain, no arm pain on exertion, no shortness of breath when walking, no shortness of breath when lying down, no palpitations, no known heart murmur, and no ankle swelling. She reports no cough, no wheezing, no shortness of breath, no coughing up blood, and no sleep apnea. She reports no abdominal pain, no nausea, no vomiting, no constipation, normal appetite, no diarrhea, not vomiting blood, no dyspepsia, and no GERD. She reports no incontinence, no difficulty urinating, no hematuria, and no increased frequency. She reports no muscle aches, no muscle weakness, no arthralgias/joint pain, no back pain, no swelling in the extremities, no neck pain, no difficulty walking, no cramps, no osteoporosis, and no fractures. She reports no abnormal mole, no jaundice, no rashes, no laceration, no non-healing areas, no changes in hair/nails, no psoriasis, no change in skin color, and no breast lump. She reports no loss of consciousness, no weakness, no numbness, no seizures, no dizziness, no migraines, no headaches, no tremor, no gait dysfunction, and no paralysis. She reports no depression, no sleep disturbances, feeling safe in a relationship, no alcohol abuse, no anxiety, no hallucinations, no suicidal thoughts, no mood swings, no memory loss, no agitation, no dementia, and no delirium. She reports no fatigue.

Physical Exam**Constitutional:** General Appearance: well-developed. Level of Distress: NAD.

SMITH, Barb ANN (Legal name: Barbara Smith) | (id #15810, dob: 09/28/1948)

Cardiovascular: Arterial Pulses Right: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Arterial Pulses Left: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Edema Right: **edema**. Edema Left: **edema**. Varicosities Right: **varicosities**. Varicosities Left: **varicosities**.

Integumentary: Foot Right: no lesions, ulcers, skin rash, or subcutaneous nodules;**dry, atrophic, and hair absent**; and skin temperature normal. Foot Left: no lesions, ulcers, skin rash, or subcutaneous nodules; **dry, atrophic, and hair absent**; and skin temperature normal.

Neurological: Neurological Right: **paresthesias, gross sensation diminished, and pin prick sensation decreased**. Neurological Left: **paresthesias, gross sensation diminished, and pin prick sensation decreased**. Manual Muscle Test Right: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance). Manual Muscle Test Left: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance).

Musculoskeletal: Muscle Strength and Tone Right: normal and normal tone. Muscle Strength and Tone Left: normal and normal tone. Joints, Bones, and Muscles Right: **contractures, limited ROM, bony abnormalities, and pain to palpation**. Joints, Bones, and Muscles Left: **contractures, limited ROM, bony abnormalities, and pain to palpation**.

Class: Class B Right: **skin texture shiny and thin; dorsalis pedis pulse diminished posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class B Left: **skin texture shiny and thin; dorsalis pedis pulse diminished posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class C Right: **burning, paresthesias, edema, cold foot, and temperature changes** and no claudication. Class C Left: **burning, paresthesias, edema, cold foot, and temperature changes** and no claudication.

Toenails 1 through 5 are thickened, discolored, dystrophic, clinically mycotic, and not elongated bilaterally.
2 necrotic ulcers noted to left lower extremity measuring approximately 2.5 cm x 2.0 cm x 0.5 cm and 1.5cm x 1.0 cm x 0.5 cm. Some surrounding erythema.
Right third digit amputation
No calf pain.
DP, PT palpable bilaterally.

Procedure Documentation

Skin Graft-Innovamatrix:

Skin Graft To advance wound healing, an appropriate skin substitute was selected and applied to wound after debridement.
Skin Substitute: Innovamatrix AC
Size-- 2 cm x 2 cm
Product ID-- IMX-0202-01
Lot Number-- 110722-2
Expiration Date-- 2024-11-07
Application number-- See graft log
Zero graft wastage.

I87.2: Venous insufficiency (chronic) (peripheral)

SMITH, Barb ANN (Legal name: Barbara Smith) | (id #15810, dob: 09/28/1948)

Discussion Notes

Today diagnosis, treatment, etiology discussed with patient.

Physical exam was performed today.

Sharp debridement of all 2 painful ulcers to the left lower leg. All 2 areas grafted with innovamatrix graft today. Grafts were covered with Adaptic gauze, dry gauze, Kling, Ace bandages. Home health to redress the area every 3 days between now and next visit. Home health to keep Adaptic gauze in place and change dry gauze and Ace bandages.

Patient to keep legs offloaded with pillows as much as possible.

Patient to continue daily exercise for at least 20 minutes to activate calf pump mechanism.

Patient to continue follow-up with vascular surgeon as directed.

Patient is to ensure complete offloading of bilateral lower extremities while resting at home. Patient is to keep compression dressings intact as well as avoid shaving or altering skin when showering day of change.

Patient to follow-up in 1 week for continued evaluation.

HPI

Pleasant 75-year-old diabetic female presents today for follow-up on left leg wounds. Patient reports that she and home health has been dressing the wounds with dry gauze dressing and Ace bandages over the Adaptic gauze. She reports she has kept the Adaptic gauze in place since last visit. Reports that the leg pain has improved. She is scheduled for a breast biopsy tomorrow for a mass. No other complaints at this time.

ROS

Patient reports **vision change** but reports no dry eyes, no irritation, and no eye disease/injury. She reports **easy bruising** but reports no swollen glands, no excessive bleeding, no anemia, and no phlebitis. She reports **runny nose and frequent sneezing** but reports no sinus pressure, no itching, and no hives. She reports no fever, no night sweats, no significant weight gain, no significant weight loss, no exercise intolerance, no chills, and no malaise. She reports no difficulty hearing and no ear pain. She reports no frequent nosebleeds, no nose problems, and no sinus problems. She reports no sore throat, no bleeding gums, no snoring, no dry mouth, no mouth ulcers, no oral abnormalities, no teeth problems, no ringing in the ears, and no sinusitis. She reports no chest pain, no arm pain on exertion, no shortness of breath when walking, no shortness of breath when lying down, no palpitations, no known heart murmur, and no ankle swelling. She reports no cough, no wheezing, no shortness of breath, no coughing up blood, and no sleep apnea. She reports no abdominal pain, no nausea, no vomiting, no constipation, normal appetite, no diarrhea, not vomiting blood, no dyspepsia, and no GERD. She reports no incontinence, no difficulty urinating, no hematuria, and no increased frequency. She reports no muscle aches, no muscle weakness, no arthralgias/joint pain, no back pain, no swelling in the extremities, no neck pain, no difficulty walking, no cramps, no osteoporosis, and no fractures. She reports no abnormal mole, no jaundice, no rashes, no laceration, no non-healing areas, no changes in hair/nails, no psoriasis, no change in skin color, and no breast lump. She reports no loss of consciousness, no weakness, no numbness, no seizures, no dizziness, no migraines, no headaches, no tremor, no gait dysfunction, and no paralysis. She reports no depression, no sleep disturbances, feeling safe in a relationship, no alcohol abuse, no anxiety, no hallucinations, no suicidal thoughts, no mood swings, no memory loss, no agitation, no dementia, and no delirium. She reports no fatigue.

Physical Exam

Constitutional: General Appearance: well-developed. Level of Distress: NAD.

Cardiovascular: Arterial Pulses Right: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Arterial Pulses Left: **dorsalis pedis diminished** and **posterior tibialis diminished** and capillary refill test immediate. Edema Right: **edema**. Edema Left: **edema**. Varicosities Right: **varicosities**. Varicosities Left: **varicosities**.

Integumentary: Foot Right: no lesions, ulcers, skin rash, or subcutaneous nodules; **dry, atrophic, and hair absent**; and skin temperature normal. Foot Left: no lesions, ulcers, skin rash, or subcutaneous nodules; **dry, atrophic, and hair absent**; and skin temperature normal.

Neurological: Neurological Right: **paresthesias, gross sensation diminished, and pin prick sensation decreased**. Neurological Left: **paresthesias, gross sensation diminished, and pin prick sensation decreased**. Manual Muscle Test Right: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance). Manual Muscle Test Left: plantarflexors 5/5 (movement against resistance), dorsiflexors 5/5 (movement against resistance), invertors 5/5 (movement against resistance), and evertors 5/5 (movement against resistance).

Musculoskeletal: Muscle Strength and Tone Right: normal and normal tone. Muscle Strength and Tone Left: normal and normal tone. Joints, Bones, and Muscles Right: **contractures, limited ROM, bony abnormalities, and pain to palpation**. Joints, Bones, and Muscles Left: **contractures, limited ROM, bony abnormalities, and pain to palpation**.

Class: Class B Right: **skin texture shiny and thin; dorsalis pedis pulse diminished, posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class B Left: **skin texture shiny and thin; dorsalis pedis pulse diminished, posterior tibial pulse diminished, advanced trophic changes, hair growth decrease, nail changes, and pigmentary changes**; and skin color normal and no redness. Class C Right: **burning, paresthesias, edema, cold foot, and temperature changes** and no claudication. Class C Left: **burning, paresthesias, edema, cold foot, and temperature changes** and no claudication.

Toenails 1 through 5 are thickened, discolored, dystrophic, clinically mycotic, and not elongated bilaterally.

SMITH, Barb ANN (Legal name: Barbara Smith) | (id #15810, dob: 09/28/1948)

2 necrotic ulcers noted to left lower extremity measuring approximately 3.5 cm x 2.5 cm x 0.5 cm and 2.5cm x 1.5 cm x 0.5 cm. Some surrounding erythema. There is a small third ulcer anterior shin 0.5 cm x 0.5cm
Right third digit amputation
No calf pain.
DP, PT palpable bilaterally.

Procedure Documentation

Skin Graft-Innovamatrix:

Skin Graft To advance wound healing, an appropriate skin substitute was selected and applied to wound after debridement.
Skin Substitute: Innovamatrix AC
Size-- 2 cm x 2 cm
Product ID-- IMX-0202-01
Lot Number-- 110722-2
Expiration Date-- 2024-11-07
Application number-- See graft log
Zero graft wastage.

Skin Substitute: Innovamatrix AC

Size-- 2 cm x 2 cm

Product ID-- IMX-0202-01

Lot Number-- 110722-2

Expiration Date-- 2024-11-07

Application number-- See graft log

Zero graft wastage.

Assessment / Plan

- 1. **Open wound of left lower leg**
S81.802D: Unspecified open wound, left lower leg, subsequent encounter
- 2. **Onychomycosis**
B35.1: Tinea unguium
- 3. **History of amputation of right lesser toe**
Z89.421: Acquired absence of other right toe(s)
- 4. **Disorder of nervous system due to type 2 diabetes mellitus**
E11.49: Type 2 diabetes mellitus with other diabetic neurological complication
- 5. **Peripheral vascular disease**
I73.89: Other specified peripheral vascular diseases
- 6. **Walking disability**
R26.2: Difficulty in walking, not elsewhere classified
- 7. **Antalgic gait**

SMITH, Barb ANN (Legal name: Barbara Smith) | (id #15810, dob: 09/28/1948)

R26.89: Other abnormalities of gait and mobility

8. Venous insufficiency of leg

I87.2: Venous insufficiency (chronic) (peripheral)

Discussion Notes

Today diagnosis, treatment, etiology discussed with patient.

Physical exam was performed today.

Sharp debridement of all 3 painful ulcers to the left lower leg. All 3 areas grafted with innovamatrix graft today. Grafts were covered with Adaptic gauze, dry gauze, Kling, Ace bandages. Home health to redress the area every 3 days between now and next visit. Home health to keep Adaptic gauze in place and change dry gauze and Ace bandages.

Patient to keep legs offloaded with pillows as much as possible.

Patient to continue daily exercise for at least 20 minutes to activate calf pump mechanism.

Patient to continue follow-up with vascular surgeon as directed.

Patient is to ensure complete offloading of bilateral lower extremities while resting at home. Patient is to keep compression dressings intact as well as avoid shaving or altering skin when showering day of change.

Patient to follow-up in 1 week for continued evaluation.
